

**SLEEK DESIGN**

**TOUCHLESS INTERFACE**

**HOLOGRAPHIC**

**UBIQ** is manufactured holographic touchless interface kiosk from a clients idea to a pencil sketch...to reality at the 2010 CES Expo. The image floats in mid-air. You can interact with it by moving your hands in front of it, you never touch anything to make it work. Projected image can be Landscape 52" or Portrait 62", can be 4:3 or 16:9 ratio...this thing is awesome. It's brand new, no telling where I'll take this design in the future. Look for it in hospitals, arenas and theaters.

MDKS' Indoor Touch Screen Kiosks are manufactured for a trouble-free operation. All components are industrial grade components taking these units to an impressive MTBF value. All units are complete with heavy-duty baseplates. Optional over sized baseplates with rear kick wheels are also available.

I.M.G is the company we build these kiosks for exclusively. If you are looking for one, contact Jason Opat at I.M.G. The U Biq is an indoor Kiosk available thru specific Reseller, please inquiry within.

*"Wave your hands in the air, like you just don't care."*

Sizes:  
Landscape 52.1" Or Portrait 62.1"
